

YOUR TAILOR-MADE **GRADING SOLUTIONS**

**Choose our systems
for your apples**

**Elisam can provide a full system
from feeding to final packing
for your apples:**

- Bin dumping
- Feeding
- Washing
- Drying
- Grading
- Packing

Apples are extremely delicate products that require special attention and gentle handling. Elisam has been devoted in creating a grading system focused on reliability, delicacy and velocity. In this mission emerged the “**GRAN TORINO**”.

Elisam can grade your apples by weight, size, colour, external quality and internal quality in one unique machine.

Technical Features:

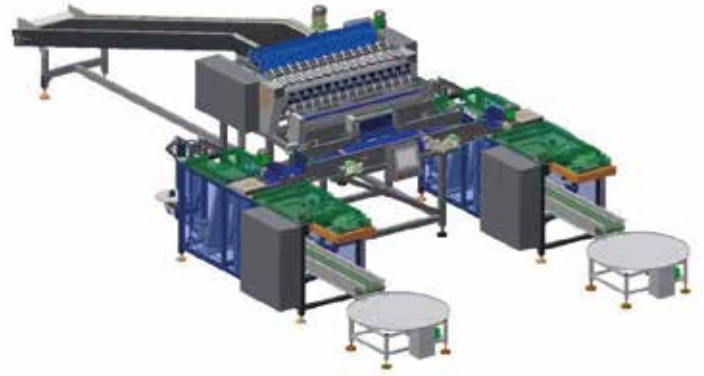

- Number of lanes: from 1 to 8
- Kind of trolley: cup and roller
- Electronics: Ellips TRUE SORT

INTERNAL AND EXTERNAL QUALITY

How many defects does an apple have? What percentage of the apple is rotten?

- Up to 10 measurements per apple
- Fast and easy start-up; user-friendly software
- Sensor mounted above the lanes to avoid pollution of the sensor
- Software combines 2D and 3D images in order to obtain the best results

WATER FLUMES SYSTEMS:

- Extremely short, multi-layered fruit water canals
- Fruit capacity +/- 300 kg plus 50 kg in transit storage
- Automatic bin filler up to 10.000 kg/hour

MULTIHEAD WEIGHERS:

- Fast, accurate, reliable
- Performance: up to 35 bags per minute
- Exits on both sides of the weigher
- Accuracy: Minimum Tolerance in comparison to the pre-set weight

Not only apples...

No time to waste!
